U.S. EXPORT SALES

- Outstanding Export Sales
(Unshipped Balances)
on November 10, 1974
- Export shipments in
Current Marketing Year
- Daily Sales reported
November 11-19

--As Reported by Exporters

Readers of this release are cautioned that it reports sales commitments outstanding as of the date indicated, all of which are subject to modification, deferral or cancellation by mutual agreement of the parties. It is unlikely that all reported quantities will be exported. Our brief experience with this monitoring system suggests that sales are apt to exceed exports, sometimes by substantial amounts, during periods when supplies are in balance with expected demand. Actual shipments to date may provide a more reliable measure of current export activity. A meaningful export projection is not obtainable by the simple device of adding outstanding sales commitments to exports to date.

NOTICE

Plans are under way to revise the weekly tables on pages 4 through 34 to list outstanding export sales and accumulated export shipments to the indicated date for only these regions and countries: European Community, other West Europe, Eastern Europe, U.S.S.R., Japan, Republic of China, Peoples Republic of China, India, other Asia and Oceania, Africa, Western Hemisphere, and total unknown destinations. The purpose is to eliminate the profusion of individual country listings. Outstanding export sales for delivery in the next marketing year also would be published for these regions and countries.

Under the plan, data for cotton and rice would be published as all cotton and all rice, eliminating class or staple length.

After release of the report, commodity data by individual countries of destination, and by class or staple length where appropriate, would be made available for public inspection.

The objective of the plan is to meet data needs of users, provide additional detail for those who seek it out, and substantially reduce government costs.

EXPORT SALES REPORT

Comments on November 21, 1974, release:

Wheat: Additional purchases by India were the main feature of the past week. Under the daily reporting system, new sales totaling about 925,000 metric tons (M.T.) to India were reported, with delivery through March. While India's purchases from all origins for delivery during the first half of 1974/75 appear to average about 550,000 M.T. per month, these new sales covering shipments mainly during the January-March period appear to indicate an increased rate of delivery during the first quarter of 1975. The rate of delivery may fall thereafter since India's wheat harvest occurs in April-May.

Feed Grains: During the week, new sales of corn for 1974/75 totaled less than 200,000 M.T. the smallest weekly increase since September 29. New corn sales were reported to East Germany, Portugal and The Netherlands but were largely offset by reductions in outstanding sales to unknown destinations.

Rice: Limited sales of 18,000 M.T. during the week were less than exports. As a result, there was a decline in outstanding sales to both known and unknown destinations.

Soybeans: Exports during the week reached 497,800 M.T., the highest weekly total in 1974/75, with shipment of 278,600 M.T. to European Community (EC) destinations accounting for almost 56 percent. As a result the unadjusted annual rate of shipments during the first ten weeks of 1974/75 reached 12.9 million M.T., up sharply from the 11.5 million M.T. rate through the previous week.

Soybean Cake and Meal: Exports to date plus outstanding sales to EC countries for 1974/75 now exceed 6.6 million M.T., more than double U.S. exports of 3.1 million M.T. to these destinations in 1973/74. However, USDA currently estimates that total 1974/75 exports to the EC will fall slightly below the 1973/74 level, partly because of an anticipated 10 percent cut in EC poultry meat production.

Increased exports of soybeans and products from Brazil and fish meal from Peru during the second half of 1974/75 are likely to coincide with slackening demand for protein feeds in foreign markets because of falling livestock profits. Accordingly, U.S. exports of soybeans and products may be larger during the first half of 1974/75 than during the April-September 1975 period.

Cotton: At just over 4.1 million running bales, reported export commitments for U.S. Upland Cotton in 1974/75 remain virtually unchanged. Small net reductions to Japan, Taiwan and Hong Kong were offset by additions elsewhere, mainly in West Europe, Canada and the Philippines.

Note: Because of the Thanksgiving holiday the next report will be issued on Friday, November 29, 1974.
